ABOUT ME

I thrive on exploring the unknown, turning ideas into innovative solutions, and continuously leveling up through every iteration. With strong communication and leadership experience across multiple organizations.

EDUCATION

Chang Gung University (CGU) | 2019 - 2023

Bachelor of Electrical Engineering

Solid background in Electrical Engineering, with strong foundations in electronic circuits, engineering mathematics, and signal-related theory.

National Chengchi University (NCCU) | 2024 -2026

Master of Computer Science

- Completed coursework in **data mining, data science**, machine learning, deep learning, and gained hands-on experience with **AWS cloud services**.
- Built a **data science system** analyzing **Taipei's rental market**, using machine learning models to predict rental price distributions.
- Conducted a **graduate thesis** in collaboration with **National Taiwan University Hospital (NTUH)**, developing a **multimodal AI model for early-stage Parkinson's disease detection**.

EXPERIENCE

NCCU Consulting Club – Learning Group Leader

Organized and facilitated weekly sessions analyzing industry reports, news insights, case studies; guided team members in developing structured thinking and business problem

NCCU Entrepreneurship Association – Head of Events

Partnered with external companies, accelerators, and ecosystem stakeholders to co-organize innovation talks, workshops, and competitions

NCCU Financial Industry Research Club – Project Research Analyst

Conducted an industry analysis of Taiwan's passive components sector with a focus on MLCCs, synthesizing supply-chain dynamics, competitive positioning, and end-market demand trends.

STP 23 th Talent Seed Program

Conducted a research project with Eternal Materials (永光化學) on TNFD (Taskforce on Nature-related Financial Disclosures) trends; drafted a preliminary TNFD strategic proposal analyzing nature-related risks, impact pathways, and disclosure frameworks.

2025 Epoch school YEFer Entrepreneurship Program

Served as **CTO** in the Infintas team, developing an AIoT voice-controlled assistant
